

File 20111101.0826: Notes from meeting with Dr Martin, 1400 his time which was only six hours ahead for me this week.

I met Tuesday afternoon with Dr Martin. I reported much activity but no progress. The Air Force contract requirements for quarterly and annual summary reports were delivered; the final report is due today. I wrote a presentation for the patent review board next week and worked on a possible new funding source, BAA 10 09 RIKA 'Cross Domain Innovative Technologies', but I do not know if I should accept it. The amount of time demanded by Lockheed is increasing. I have meetings tomorrow with an HR manager at Lockheed and with my financial advisor to determine what I can afford to do.

We talked about the ISPP seminar on mobile phone theft; Dr Martin is going to forward me the speaker's slides. OXFORD-CS-2011 programme committee work is almost wrapped up; reviews are due this week but afterwards the local committee members will run the show and the conference dinner. No security reading group this week; I have a couple of papers I would like to suggest but no time to prepare, so I haven't put one forth. I reported that I have week-to-week funding presently; I am hopeful that tomorrow's meeting will reduce the pressure. I promised to meet with Dr Fléchais and set a schedule after submitting the final technical report.

Next meeting is scheduled for Tuesday, 8th November after reading group.

Dr Martin said he doesn't know which to wish for me. He suggested that the COMLAB-CS-2011 conference could be live streamed for my benefit. Dr Martin is going to put Justin in charge of coordinating Reading Group and making sure there is a paper each week.

Dr Martin would like to see the AFRL final technical report.
