

File 20100807.2100: Olav Kjono sent out an email today to the TISS team that included the following:

We absolutely need to maximize orders and sales and generate backlog so we can grow the workforce and keep everyone fully engaged as we enter the late summer and Fall. Once the NMSO proposal cut-off goes into effect, there will be less opportunity to generate FY10 Orders so we really need to give it our all these next couple of weeks.

The complete email is in my files.
