- Baasit Saijid
- `donald.p.flint@ugov.gov`
- Elisabeth L. Jubinski
- Daniel E. Nichols
- Francis James Simkular
- John William Ferguson
- Erica D. Sollers

[Note: go through other emails to get more names and cross-check.]

Paul Ozura said he will get me answer to my email questions soon.

Next task: refresh both labs and Charleston. The equipment will be shipped from Denver next week. Planned for week of 21st June.

Question from one participant on the phone: is there a NIST standard for POA&M? Answer from Dennis Bowden: don't know.

Thursday at 0800 will be the next hotwash. It will be a classified call if they want to talk about CRs. I will be there.

Internal regression testing of the 22 CRs is happening this week in Denver by PMO and Accenture. Accenture is the IV&V contractor.

Discussion of coordination for installation at STRATCOM. No changes to schedule.

Question from the phone: about posting of RM 5.0 test procedures for the CDS community?

To save time at Charleston (not having to re-run tests), all of the regression tests being run this week in Denver are being witnessed by IV&V.

Thursday next classified telecon.

Call ended 0839.
