Weekly activity report no. 20110825.1623 (GMT-7) sequence no. 0203, week 8+9 TT

I put all the evidence I have together into a draft of Chapter 3 a few days ahead of when it needs to be turned in (29th Aug). Now I am trying to smooth some of the rough edges. Travel arrangements to Oxford have been made; I will be there 6th to 9th September for confirmation of status viva. All of the necessary paperwork has been filed with the government security office for international travel. I am to Fedex the written work ahead of time giving the assessors a week to look at it.

Miscellaneous: the funding sponsor wants a poster by 6th September of the probabilistic redaction project; I owe the project manager a user guide for the software before it goes into acceptance testing next week. The legal department requested more details about a patent disclosure I filed and how it differs from an Adobe technology introduced in 2005; I have priority from 1999 but only if we write up a description of all prior art. The 2011 student conference web site and submission system are now up and running; I am supposed to modify the LaTeX template and write submission guidelines for the programme committee. I also updated the Oxford University Scientific Society web site for Michaelmas term.

Meeting with Dr Martin tomorrow. There are 20 weeks to submission. Upcoming travel: Oxford, 4th September; Rome, New York around 25th September.

Joe Loughry

Doctoral student in the Computing Laboratory

St Cross College, Oxford

End of WAR 0203.
