Weekly activity report no. 20110929.1652 (GMT-5) sequence no. 0208, week -1 MT

I met with my funding sponsor at the Air Force Research Laboratory in Rome, New York this morning. We demonstrated the software and I presented the last two and a half years of research results. The sponsor called it an especially well designed research effort and said that their Technical Council are very happy with them for doing it and want them to do more like it. I fly back tomorrow; tonight I am transcribing notes from the meeting.

With the end of the Air Force contract, I have to find new funding; unfortunately, the government underfunded my department at Lockheed over a million dollars this year and they are trying to shed people as it is. I was contacted by a specialised information security group in the company called JAGUAR who might try to hire me.

Miscellaneous: I was contacted by the MPLS graduate division looking for my confirmation of status paperwork; it is holding up registration. I emailed Julie Sheppard who tracked it down and got it signed; the paperwork will be to MPLS by the end of the week and they can release the hold on my enrolment.

I reviewed some security engineering process information for the Centre for Cyber Security Innovation this week. No reading group this week, but most of my time was taken up anyway preparing a presentation for the funding sponsor, travel, reports, and meetings.

Joe Loughry

Doctoral student in the Computing Laboratory

St Cross College, Oxford

End of WAR 0208.
