

File 20090422.1406: Notes from reading group today: meeting with Dr Martin today:

- $\text{risk} = \text{threat} + \text{vulnerability} + \text{impact}$ (Ivan)
- ‘Dijkstra’s reusable theorems’: you can prove them over and over again.

Notes from meeting today with Dr Martin:

- Did Green Hills really start with a blank sheet of paper?
 - Is their process really a lot different from an existing system? Compare BeOS.
 - Are there any blank-sheets-of-paper in software engineering?
- Bring the Table of Contents of my dissertation to meeting with Dr Martin next week. We want to use it to focus on specific goals.
- Papers that I write ought to be a thesis chapter.
- Look at the TOC to focus on what the chapters are.

Next meeting: Wednesday, 29th April 2009 at 12:30 p.m. in Dr Martin’s office.
