

File 20110308.0833: Notes from meeting with Dr Martin:

The drugs the doctor gave me are making me sick, but I should be cured by the time I have to get on a plane in a couple of days. I need sleep desperately, have to get as much as I can in the next two days before I won't get any on travel.

I met with Dr Martin briefly this week to report on new information I received regarding inter-developer interactions in the CDS ecosystem and how it affects data owner perceptions of the accreditability of CDS alternatives when they specify their architectures. The letter I got unexpectedly from one of my correspondents contains a wealth of specific detail but I am not sure how it fits in yet. It is clear how to code the information, and how to insert it into the issue network, but what remains nebulous is how much to allow it to colour the emergent direction of the grounded theory. I have three other people to talk to in light of this new information: JP/F, TF and GS who were all directly participants in the event. If I get positive results from two of the three, I will let the sub-graph have a nonzero weighting factor.

I have time booked next week with Dr Martin to go over progress. Additionally, I want to meet with Dr Jirotko to discuss low-level implementation of the GT, particularly the standard of presentation of evidence. Application for confirmation of status is due the first Tuesday after Easter; it is good to take all the time that is available. No reading group meeting tomorrow, but I will be there for the security reading group meeting next week.

Yesterday's seminar with Rt. Hon. David Blunkett, MP reportedly went well. Dr Martin is sending me the recording.

Dr Martin had lunch with Dr Ashbourn. She asked how I was getting along toward confirmation of status; Dr Martin said he was optimistic.
