

File 20111130.1028: Notes from meeting with Dr Martin:

Dr Martin and I met via Skype this week; I reported that the report ‘Probabilistic Redaction’ will be published as a journal article next year; it is in peer review now. I reported some progress on thesis work in the area of informal systems and we discussed the example of email retention policies. I have been working on the certification process model but having trouble making what Dr Fléchais wants. I met with managers at Lockheed yesterday on my transition.

We discussed what happened at reading group yesterday.

Next meeting scheduled for 7th December 2011 at a little after 5pm Oxford time.

Advice for talking to Dr Fléchais tomorrow: he has read my previous status reports; he remarks on them to Dr Martin sometimes, so keep the overview of the last two months’ activity brief. Ask for advice on what to do next.

Apply for extension; fax the paperwork to Dr Martin at 283531.
