Weekly activity report no. 20110526.1446 (GMT-7) sequence no. 0190, week 4 TT

I mailed the first page of the new introduction to Dr Martin. If he approves the approach, I will complete the first draft of chapters 1--4 in the same style. In the middle of writing, I had to go back to Backhouse & Dhillon (1996), DoD 8510.01, and Whyte's book (1956). I obtained a newly published report from the U.S. Navy this week on implications of aggregated information systems for DIACAP C&A. The report renders moot a couple of assertions I made about the aim and scope of SABI approvals with respect to national security systems. Now I have to work around it.

Meeting with Dr Martin tomorrow. Other than writing and re-writing over and over with little to show besides a collection of unconnected sentences, small progress to report this week.

Joe Loughry

Doctoral student in the Computing Laboratory

St Cross College, Oxford

End of WAR 0190.
