

File 20110512.1111: Notes from LMCO all-hands meeting, 1000 this morning, for ‘rumour control’. So far, they have let go four engineers. Gary Edge is leaving the programme soon—may be picked up by TMAN. They do not foresee any more RIFs this year. The programme is negotiating a Financial Exposure Authorisation (FEA) with LM corporate right now; it may be capped at \$250,000 or it could be a bit more. the Navy owes LM \$450,000 as of the end of May. Funding may be a problem for a few weeks. Systems Engineering tasks managed by Kevin Miller will be scrambling. Everyone’s jobs are probably secure through the end of the year, but that could change in a week or a month. OK to talk to Savage or Christiansen if you have concerns. It is Task Order 200—infrastructure—only. Work on other task orders is unaffected by this slowdown.
