Weekly activity report no. 20120126.2025 (GMT-7) sequence no. 0225, second week HT

I am working on a draft of the entire dissertation from beginning to end. I need to see where everything is and where all the pieces fit. Activity this week should have been entirely devoted to coding in ATLAS.ti, but I got distracted. I will catch up for the lost time.

Reading Group this week was to go over the paper by Stefan Viehbck, titled 'Brute forcing Wi-Fi Protected Setup', but due to wide interest and many people being out of town it was postponed. Dr Martin and I were both on the line, however, so we had an unscheduled meeting. There are unanswered questions in Viehbcks's paper; I bought a copy of the Wi-Fi Simple Configuration Technical Specification Version 2.0.0. I can verify details of the WPS protocol for members of reading group next week.

Google+ Hangout is a superior video conferencing tool, more reliable than Skype.

I will meet with Dr Flchais tomorrow morning.

Joe Loughry

Doctoral Student in the Department of Computer Science

St Cross College, Oxford

End of WAR 0225.
