

File 20100331.2118: Notes for camera-ready version of VALID 2010 paper (camera ready):

CESG's report that S^* was 'not fit for purpose' was not capricious—it was carefully considered, based on analysis with subtle and powerful tools, and took into account the safety of the entire BOWMAN system that SOOTHSAYER would have been connected to. Please clarify CESG's heroic rôle in the final copy of the paper in or around May 2010.
