

File 20110307.2127: Meeting with Dr Martin in the morning, 0800. Because I am still sick, I do not have a lot of progress (other than deep thoughts) to report. I am going to try to show him how deeply I have been thinking about the GT. I hope it works. I went to the doctor yesterday and she loaded me up with pills. They are making me sicker at the moment but promise to cure all before I have to fly on Thursday morning.

I want to talk about Chip's revelations about Raytheon tomorrow with Dr Martin. It's interesting, but I am not sure I can use it. Need to get more sides of the story, from Jackie and Tom Flaherty and Greg Shettlesworth.
