Weekly activity report no. 20111229.2258 (GMT-7) sequence no. 0221, week -2 HT

I spent the week researching and writing a dual-purpose paper that will satisfy a Lockheed requirement at the same time as comprising the entirety of Chapter 6 of my dissertation. I talked with Dr Flchais about it by email on Friday. Under the circumstances I described to Dr Flchais, it seemed necessary to move the Chapter 6 task from late in the schedule to now, which should not affect the end date. I will have the paper done by the first week of January, then return to schedule. It partly solves the validation problem and is part of the argument.

I met with the patent attorney Monday to begin drafting an application for patent on the other idea; it should be possible to get that filed in January.

Next meeting with Dr Martin is 4th January.

Joe Loughry

Doctoral Student in the Department of Computer Science

St Cross College, Oxford

End of WAR 0221.
