

File 20090519.1700: Notes from meeting with Dr Martin today:

- Lots of advice, what I needed.
 - How to write things down that are in my head.
 - ‘This is what I am doing; this is why.’
 - The tree of back-tracking won’t be in the final version—example of the inherent dishonesty of scientific writing.
- It is okay to lay out all the potential routes, some even just in the form of notes.
- Still waiting on CESC contact.
 - Ping Dr Ian Levy’s email primary address again.
- Next meeting: Wednesday, 27th May at ~~11:00 a.m.~~ rescheduled for 10:30 a.m.
