

File 20110718.1511: Notes for the methodology (I am reading [1] at the moment). Why did I not use Atlas.ti? Notation: prepended superscripts to mark phrases in the left two-thirds of the coding form page, matching (also prepended superscripts?) on the right side of the page.

Theory goes from the particular to the general [1, p. 13].

I need a month to write Chapter 3.
