

File 20120224.1300: Notes on HAZOP applied to project management for early detection of problems:

What does it mean to be a 'hazard'? We can apply 'over' 'under', 'more of', 'less of' to things like progress reports (visible), percentage done, and other metrics. But what does 'no flow' or 'reverse flow' correspond to? Retrograde progress? Look up the basics of HAZOP in Kletz's own words.
