

File 20090121.1115: Notes from meeting with Dr Martin this morning:

I should do three UK interviews before leaving for the US in August 2009.

Fix the Scheme code for updating the Gantt chart schedule automatically (computing dates and intrapage dimensions).

ORA (Oxford Research Archive) might be a good place to host the Comlab DPhil students' transfer report repository. Including my notes from how the viva went would be okay as long as I get permission from the assessors.

DO set up a trip to Bletchley Park with the SE-Reading group when the weather is nice. TODO: query people for schedule and pick a date.

TODO: I volunteered to check out the Distance Bounding paper for next week's reading group—put it on the Wiki.

Validation of thesis project: Dr Martin and I discussed several alternatives for handling the funding and IP issues.

More than one validation would be good, too. Maybe even three total validations. One of them could be an opinion from a tame or retired accreditor willing to give an opinion.

April 2009: TRUST conference will be held in Oxford at St Hugh's college. David Kleidermacher will be there to speak at the conference. I emailed him and said I'd like to meet.
