

File 20110407.2032: Make a note: will NIST 800 series overtake CC the way TCP/IP did to OSI?
More notes from an imagined conversation:

DR MARTIN: Why aren't you done writing chapters yet. You haven't written anything at all, have you?

ME: Um. . .

DR MARTIN: Why aren't you following the assessors' direction?

ME: The assessors' way is dumb. I am doing it my way.

DR MARTIN: No you're not. You're supposed to be doing it the assessors' way.

Why don't I ever have these conversations with my supervisor for real?

I am feeling scared. Eleven days to go, and I still have to write chapters. That is not much time.
