

File 20100127.0643: Notes from reading group today:

Ivan: trust allows you to shortcut a choice.

Transitive trust: what about transitive mistrust? Reputation based systems. One person mistrusting an entity can cause a fan-out effect, resulting in lots of other people mistrusting that entity.

Next week: Jun's paper on banking in South Korea, at 0430 instead of 0540.
