

File 20080314.0826: Think about what C&A means and requires in today's (or tomorrow's) environment—interconnectivity, pervasive computing, etc. First, to predict where things are going.

What's plausible in Oxford? There is scope there? Theoretical component needed.

10^6 devices, what does the Formal Component look like? Google Android, VxWorks, embedded devices?

Who is the audience for the transfer of status? Assessors.

I need to show some planning elements. Mostly a blank sheet of paper, though.

CESG (David J. Martin) Dr Martin met this gentleman in Japan. He is Technical Director, Assurance Services, A2h CESG, Cheltenham. His email address is david.martin@cesg.gsi.gov.uk (U.K. C.C. scheme director).
