

File 20111129.1325: Notes from meeting with Kevin Miller, in his office after the all-hands. Kevin needs a detailed plan for exactly how I plan to spend 20 hours per week for the next four weeks.

- 28th November: 12 hrs on proposals, 8 hrs on NFS failover
- 5th December: research SCAP [`scap.nist.gov`]
- 12th December: must be security related
- 19th December: ask Jeff Dutoit
- 26th December: ???

Kevin needs twenty hours, hour-by-hour, for the next four weeks to satisfy Level Load.

Notes on SCAP: SCAP is probably an XML report, but we don't know. Plenty of information available to read about it. It is a new DoD requirement for guards. We need to know what it is we need to do to satisfy it. Probably will be lots more than 20 hours here.
