

File 20110421.1100: Notes from engineering staff meeting: do not pre-post hours that are not vacation hours. Friday 10:00 Denver time (is that AM or PM?) is when STARS must be complete. *Never* forward-post hours not already worked. It is not permitted to enter hours for tomorrow even if you are sure you are going to work them.

In the LM Voice survey, answer the questions in the way *they* (the survey designers) think the definitions of ‘the leader who most influences your work’ work. Add comments if necessary to clarify. (I went back into the survey and reviewed my answers, decided to leave them as they were originally entered.)

The programme is done with RM 5.01, unless more testing turns out to be necessary. Looking for sustainment funds for 5.1 now. According to Ernie, ‘it doesn’t look promising to keep everyone on programme for the rest of CY 2011.’ It’s a funding problem.
