Weekly activity report no. 20110922.1544 (GMT-7) sequence no. 0207, week -2 MT

Between times reading the dissertations recommended to me by Dr Flchais on grounded theory model building, I have been planning how to finish CS1 and get on to CS2 and CS3 soon. Next week 28--30th September I will be in New York at the USAF Rome Laboratory for the final report, delivery, and installation of their probabilistic redaction system. A number of reports are due soon for the end of the contract and I must prepare a presentation.

Miscellaneous: call for papers was issued this week for the 2011 CS department student conference; the committee have been working behind the scenes on conference organisation.

Reading: Adams (2001), Faily (2011), Flchais (2005), and following references.

Joe Loughry

Doctoral student in the Computing Laboratory

St Cross College, Oxford

End of WAR 0207.
