File 20091021.1016: Kevin Miller just called. He is working on RM's response to the 600+ security controls in NIST SP 800-53. This is not even something we're required to do—we are only doing it to try to assist the certification authority, who of course are new to this as well. I offered to help review anything Kevin can send to me. He will finish his part today and send it to me. He says parts of his response are well written and parts are poorly written. Maybe I can be of help.
