File 20080510.2224: Notes for Transfer Report oral presentation (defence):

- 'Here are the data sources I intend to use: {`CC-CMTS` mailing list, ACME project records, literature on project runaways (UK book, et al.), trajectory through CC scheme, et cetera.'

- 'Here are the four papers I intend to publish, with three prospective conferences identified for each one. . . '

- At end of T.R. defence, leave up a complex final slide showing the whole plan at a glance: PERT chart, arrows showing papers to conferences mapping, lists of research sources, 'Thesis', methodology (with pointers to approvals, interviews, participants, etc.).

- Start your T.R. *viva* with a history of C&A schemes.

    - U.S. has ITSEC, TCSEC, DITSCAP→DIACAP, IC C&A

    - U.K. has whatever they have. . .

    It didn't work.

- (Pace back and forth professorily, hands clasped behind your back.) Adversarial style of presentation ('Well *not enough.*')
