File 20090218.0921: Ivan: today's threat is *not* just outsiders—certainly in military systems, malicious insiders are a threat.

John Lyle: the notion of the perimeter has changed.

Look at what Angela Sasser did on insider threats:

- Indicators that people might become insider threats

- Why you can't always predict. . .

Debian Fortify SSL story (Ivan)—the moral of the story. . . to remove a Fortify warning, the developer deleted an important line.
